pH Scale

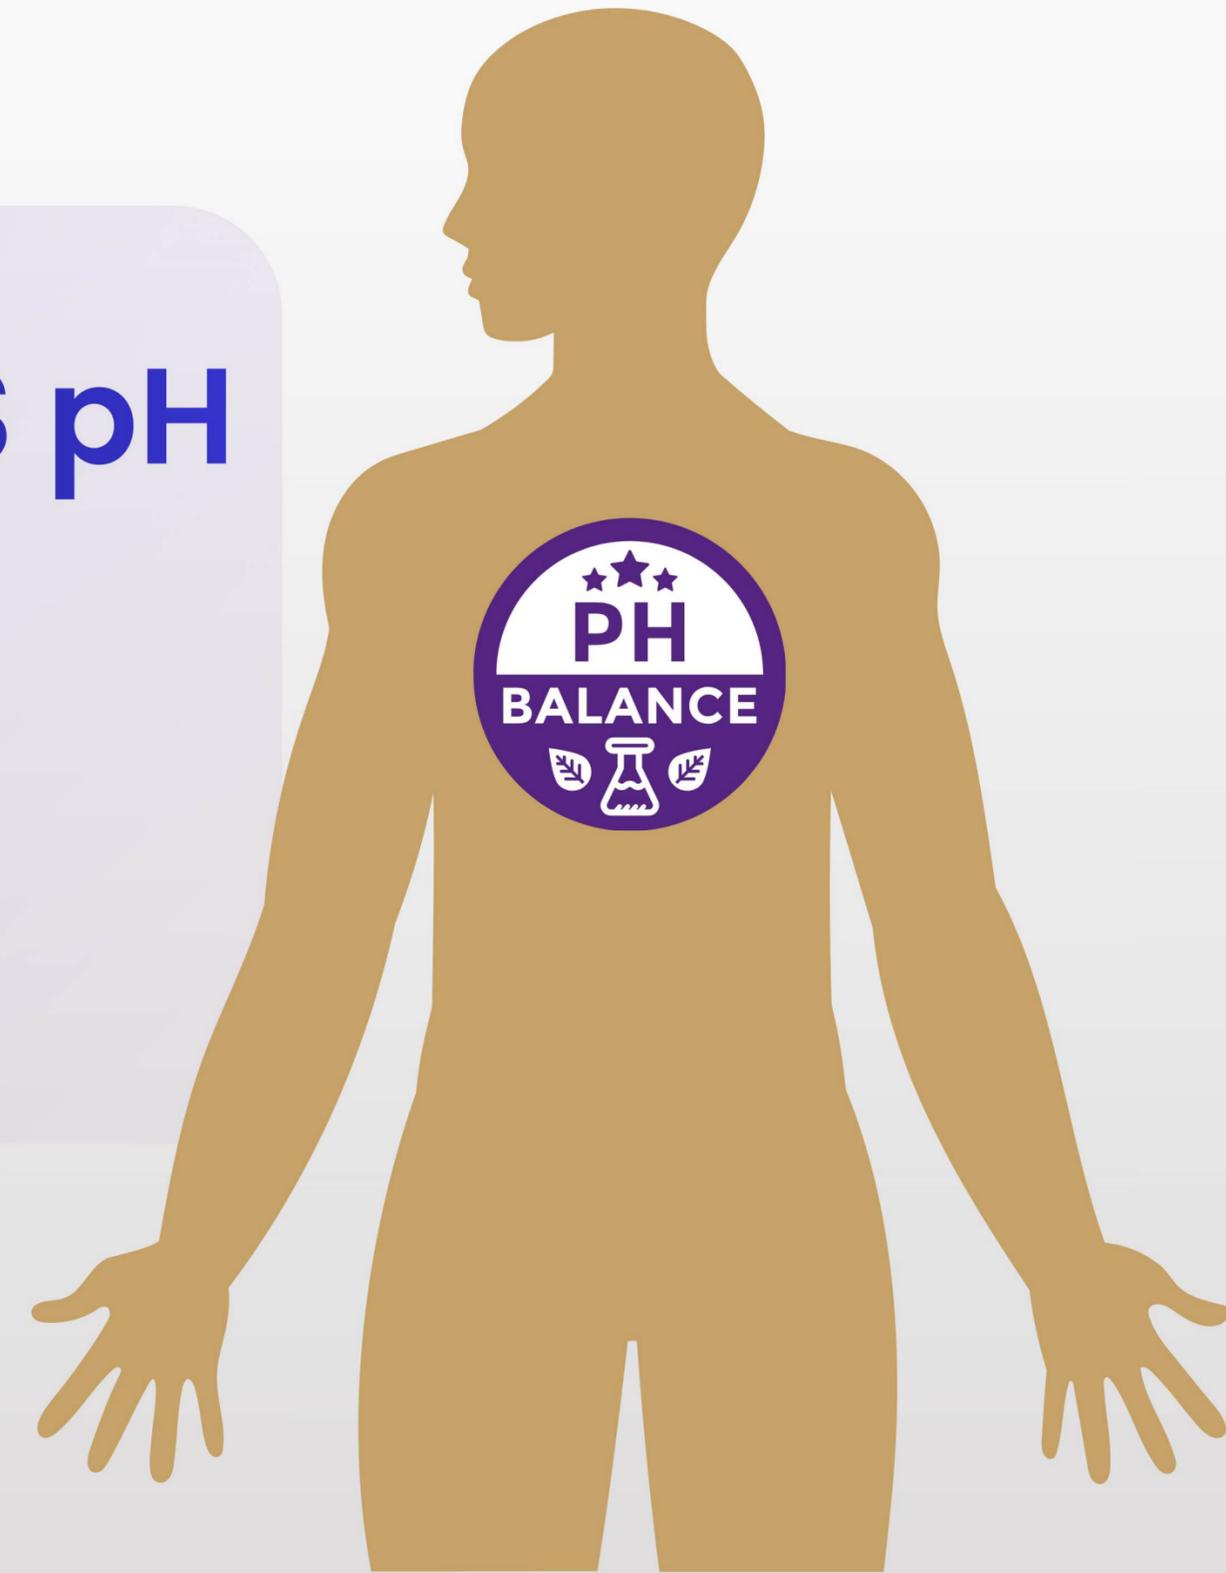

ALKALINITY

1. Normal human body pH range: 7.35–7.45.
2. A stable body pH is necessary for vital bodily functions.
3. For oxygen delivery.
4. Useful protein structure.
5. Biological reaction study.
6. Even a slight change from normal pH can incapacitate you,
7. While a rapid change in pH can cause death.

HOW OUR BODY MAINTAINS pH

1. Body pH is balanced through blood purification (via the urinary tract to filter out acidic blood for more alkaline)
2. Through breathing
3. Pure water
4. Active diet

INCREASE IN ACIDIC PH IN THE BODY CAUSES ACIDOSIS

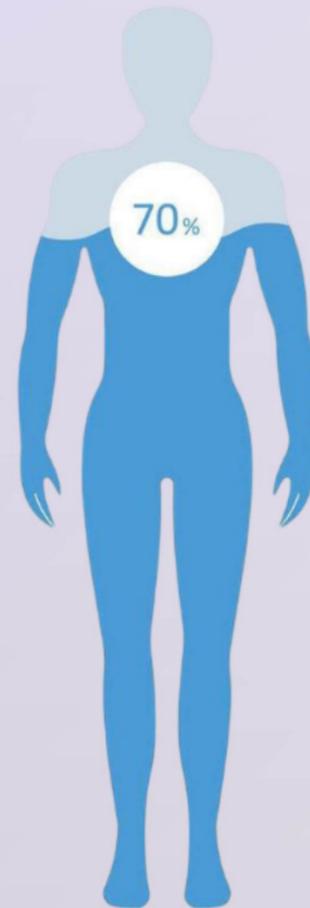

The pH of the blood drops due to an increase in acid in the bloodstream

Too much acidic content in body fluids causes Acidosis

Acidosis | The condition excess of CO₂ in the blood which lowers the pH of the blood.

Nucleo Vita+

Nucleo Vita+

NeucleoVita+ is a next-generation alkaline nutritional supplement designed to work at the nucleolus (DNA–RNA) level of the human cell. Unlike conventional supplements that act only at the cellular or metabolic level, NeucleoVita+ focuses on nuclear nutrition, supporting optimal cellular function, pH balance, and long-term systemic health.
